Herbicide Treatment Business and Residential Notice

Distribution Date : 4-14-16

Lake Minterwood will be treated with aquatic herbicide(s)/algaecide(s) on /or between May 15 through (October 1) as required. Algae control will take place throughout the summer as needed. Weed control will take place within the following timelines: May 15-June 20, July 15- July 30, August 15- August 30 and September 1-September 15.

Product(s) planned for use:

Diquat (diquat dibromide).

Hydrothol 191(Dimethylalkylamine salt of endothall)

Aquathol K (Dipotassium salt of endothall)

Glyphosate

Location of Treatment(s): Not to exceed 60 %s of the lakes littoral zone.

Plants/Algae Targeted: Pondweeds, shoreline emergents and filamentous algae will be treated to control hazardous growth.

The applicator will post signs in the treated and potentially affected areas no more than 48 hours prior to treatment.. The signs will describe any water use restrictions or advisories.

If you are withdrawing water for potable or domestic water use, livestock watering, or irrigation, and have no alternate water source, please contact the applicator Northwest Aquatic Eco-Systems at 360-357-3285 or pondweeds@comcast.net to arrange an alternate water supply.

If you would like to request additional notification prior to treatment, or have further questions, please contact me using the information above.

This herbicide treatment is regulated under a permit issued by the Washington State Department of Ecology. Permit No. **WAG 994011**
